

Photosynthesis by Peter Weatherall

E A E A
If you want to know, how a plant grows,
 E A B E
It takes water air and sunlight, and makes cellulose.
A E A E
Every plant can do this fundamental process,
A E B E
And we can call this, photo synthe sis

E A E A
Unlike me and you, plants need CO2
E A B E
And they make oxygen that stops us going blue
A E A E
Every plant can do this, fundamental process,
A E B E
And we can call this, photo synthe sis

C#m G#m A B
It's a miracle how all the chlorophyll
C#m G#m A B
Captures sunlight in the leaves, of the plants, and the trees

E A E A
A plant of any size can do it if it tries
 E A B E
But we're not green so we can't photosynthe size

A E A E
Every plant can do this, fundamental process,
A E B E
And we can call this, photosynthe sis

C#m G#m A B
It's a miracle how all the chlorophyll
C#m G#m A B
Captures sunlight in the leaves, of the plants, and the trees

E A E A
A plant of any size can do it if it tries
 E A B E
But we're not green so we can't photosynthe size
